What ScotERP does

ScotERP

Track every job

See where every job is up to, from schedule to roll to truck, so anyone can find a frame in seconds.

A schedule that keeps up

AI builds the schedule around your crews and machines to hit target dates, and reschedules when dates move.

See the floor live

Real-time machine and job status straight from your Scottsdale rollformer, so the office sees the floor.

Never run short of coil

Coil forecasting from booked jobs, so you order steel before you run out.

Stack, load and deliver

Automatic stacking with 3D stack views, load manifests for every truck and signed digital dockets.

Know your numbers

Production, labour and productivity reporting on every job, without a spreadsheet in sight.

COMING SOON

Where ScotERP is heading next

Estimating and quoting
Take-offs and quotes straight from the plans

Accounting sync
Jobs and invoices into your accounting package

Builder portal
Job status, dockets and automatic builder updates

Automatic detailing
Frame detailing generated automatically

Estimated vs actual
Real job cost against what you quoted

Automatic coil ordering
Coil forecast turned into purchase orders

Scottsdale's best practice, built into your factory

Made for Scottsdale machines. ScotERP is built around the way Scottsdale machines and the ScotSteel Software Suite are designed to run, from the schedule to the delivery.

See ScotERP on a real Scottsdale job.
