SCOTTSDALE

THE TRUSTED STEEL-FRAMING PARTNER

ScotFab

THE CLOUD-HOSTED ERP FOR COLD-FORMED STEEL FRAME PRODUCTION

**SEE YOUR FABRICATION.
CONTROL YOUR OPERATION.**

ScotFab connects ScotSteel design data with ScotRF fabrication output in one secure, cloud-based platform, giving your team real-time visibility from any device. Track projects, monitor fabrication, and manage progress through delivery and installation — with greater control over the entire operation and the insight needed to make better decisions.

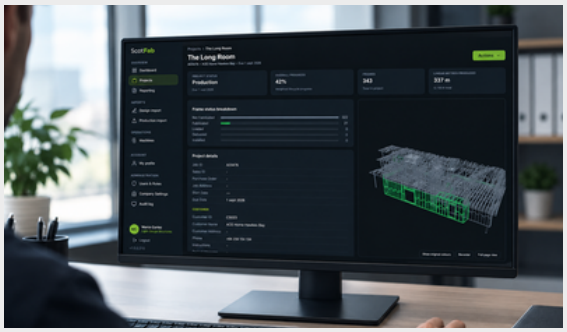

powered by ScotSteel

SCOTTSDALE

EVERY FRAME TRACKED. FROM DESIGN TO SITE.

From virtually anywhere, access real-time visibility into your framing operations without needing access to the rollformer laptop.

CONTROL YOUR OPERATION → GAIN COMPLETE VISIBILITY → MANAGE PRODUCTION → MAKE BETTER DECISIONS

KEY FEATURES

PROJECT MANAGEMENT

Track and monitor projects throughout their entire lifecycle, from initial design through fabrication, delivery, and on-site installation.

PROJECT DASHBOARD & REPORTING

Visual dashboards provide real-time visibility into project progress, frame status, steel usage, and material consumption, with detailed insights by project and by frame.

MACHINE MONITORING

Monitor your roll former with visibility into daily production totals, license status, and a searchable activity log of every item produced.

SECURE, ROLE-BASED ACCESS

User accounts are automatically created and linked to your company. Roles determine what each user can see and do within the platform.

Available for Scotpanel, Scottruss, KFS Framemaker, KFD Framemaker, KSE.
